EDUCATION

Virendra Swaroop Institute of Computer Studies   Kanpur, UP
Degree in Bachelors of Computer Application   April 2024 - Present

SJ Education Center   Kanpur , UP
Degree in 10+2
Percentage: 92.4 and 89%

EXPERIENCE

Codsoft - Remote Internship | Web Developer   Remote | Feb 2024 - Mar 2024
Interned at Codsoft, mastering web development with three projects: a functional calculator, a captivating landing page, and a professional portfolio. Hands-on experience in crafting dynamic, visually appealing web applications using HTML, CSS, JavaScript, and Bootstrap

SKILLS

Programming Languages:	Java, JavaScript, C Language, HTML
Libraries/Frameworks:	ReactJs, ExpressJs, BootStrap, Redux, React Router, Nodejs
Tools / Platforms:	Git, Github, LeetCode, VS Code, HackerRank, Postman, ThunderClient, CodeChef, GSAP

PROJECTS / OPEN-SOURCE

Portfolio | Link   *ReactJs ,GSAP,Interactive UI/UX*
1. Created a personal portfolio website showcasing projects, experience, and skills.
1. Integrated smooth animations using GSAP for dynamic transitions
1. Implemented modular design principles for scalability, with React Router managing smooth navigation across multiple pages.
1. Designed a fully responsive layout, ensuring optimal viewing experience across all devices.

Taskify - a ReactJs Application | Link   *ReactJs Redux NodeJs ExpressJs*
1. Built a responsive todo list web app which helps user in thier task management.
2. Implemented dynamic rendering of todo items using the 'TodoListComp' component, where tasks are displayed in a responsive grid layout. It also allows the deletion of any task for better user experience.
2. It features localStorage for persistent data storage and a modular design with React Router for smooth navigation and scalability.

DishTopTen | Link   *RestAPIs, Node, Express, JavaScript*
1. Created a recipe search app displaying top 10 results for user queries.
2. Integrated API for real-time data, showing ingredients, calories, and dietary info.
2. Designed a responsive, user-friendly interface with quick access to full recipes.

SkyScout | Link   *JavaScript APIs, DOM Manipulation, BootStrap*
1. Developed a weather application using JavaScript and asynchronous fetch requests.
2. Integrated real-time weather data from the "GoWeather" API.
3. Implemented features for displaying current temperature, wind speed, and description, along with a three-day forecast.

Amazon HomePage Clone | Link   *HTML CSS BootStrap*
1. Developed a responsive clone of the Amazon homepage using HTML, CSS, and Bootstrap.
2. Implemented dynamic features like navigation, search, and interactive content.
2. Leveraged Bootstrap's grid system for consistent layout and responsiveness.
